Preferred method of contact Phone E-Mail Mail

PROPERTY DETAILS

Name

Physical Address

PURPOSE OF APPLICATION

New Permit Renewal Previous Permit Number

AERIAL PHOTOGRAPH OR SKETCH OF PROPOSED NO-SPRAY ZONE AREA

Attach additional drawings if needed

Please show clearly the position of the no-spray area including road names, house/rapid number, boundaries, DP Lot info, Fonterra Nos, Culverts and other information that will help Council to locate the no-spray area.

Poor information could result in chemical spraying where it is not wanted.

REASONS

State the reasons you require a no-spray zone

OFFICE USE ONLY

Property ID	<input type="text"/>	Land ID	<input type="text"/>
RP Start	<input type="text"/>	RP End	<input type="text"/>
Side	<input type="text"/>		

CONDITIONS

The permit is valid for a period of 5 years ONLY from the date the permit was issued and the p is required to re-submit an application for a renewal within 1 month after the permit expiry date.

If the property is sold within the permit period (5 years) the permit will be terminated and that the new property owner must submit an application for a new no-spray permit.

The property owner will, at their own cost, manage all vegetation growth in the no spray zone to keep:

- The area free of pest plants
- Culverts within the area free of invasive vegetation
- Maintain clear visibility at the entrance/exit to the property

SDC may carry out minor spot treatment spraying on the edge markers, posts, reflectors and signs etc.

SDC will undertake annual inspections to confirm vegetation growth in the no spray zone is being managed. Where it is identified that vegetation is not being managed:

- A reminder notice will be issued to the property owner.
- A site inspection will take place 28 days after the reminder notice has been issued.
- If no action is apparent a second reminder notice will be sent out to the property owner.
- A second site inspection will take place 28 days after the second reminder notice has been issued.
- If no action is apparent a letter terminating the no spray zone will be sent to the property owner and the Contractor will be instructed to remove all no spray zone markers and include the area in all future chemical spraying programmes.

While SDC will endeavour to ensure the no-spray zone is excluded from its chemical spraying programmes however no guarantee is given.

I consent to the information I have provided in Sections 1 and 2 of this application being disclosed to SDC's consultants and contractors for the purposes of the operation of the no-spray zone

DECLARATION

I Declare that I have read and understood the conditions and agree to be bound by them.

STRATFORD DISTRICT COUNCIL CHEMICAL SPRAY MAINTENANCE REGIME

Stratford District Council maintains the roading network by the most economic and efficient methods possible. This includes chemical spraying to hinder vegetation growth and eradicate notable pest plants as directed by Taranaki Regional Council (TRC). Where ever possible this treatment is undertaken on all roads in the district.

The Council uses a non-toxic non-residual chemical spray (usually Round-Up) to hinder vegetation growth in road side drains and inlets of culvert pipes to maintain safe sight distances at intersections and road signs, and to eradicate any pest plants identified by TRC.

SDC has both health and safety and biosecurity responsibilities and we must ensure these are maintained.
